Citation for published version (APA):
All children, regardless of age, gender, geographical and social background, whether they are well functioning or mentally disabled, thrive under the same conditions for well-being, and learn if they thrive. The challenges that our society is experiencing, make creativity and job satisfaction basic needs that we cannot ignore.

This book is aimed primarily at the creative school and its brave defenders in a joint effort to continue to further develop the well-functioning elements and find new creative ways to meet our children’s needs for learning, development, confidence and positivity.

The purpose of this book is to inspire the teachers who believe that creativity should be a central focus in school, and that artistic creativity can greatly contribute to a more creative and reflective school. This inspiration is offered in the form of cases and examples illustrating the significant benefits that the integration of arts in teaching offers, such as positive emotions and cognitive intensity, but also in terms of concrete, effective practical tools.

Tatiana Chemi argues in the book that society’s demands for increasing the creative capital of the labour market and in society as a whole should lead the school system to develop methods and forms of learning that will enhance the students’ creative learning. She demonstrates that schools have a need to experiment with creative teaching methods. She inspires the development of teaching methods and materials. The book is evidence-based and builds a bridge between theory and practice.

Tatiana Chemi, PhD is Associate Professor at Aalborg University, Chair of Educational Innovation, where she works in the field of artistic learning and creative processes. She is co-founder and leader of the researchers group ARIEL (Arts in Education and Learning) and expert in arts integration. She is the author of many published articles and reports, and is also the author of Art-based Approaches. A Practical Handbook to Creativity at Work, Fokus Forlag, 2006, and Kunst en an integrere kunst i undervisning [The art of integrating the arts in education], Aalborg Universitetsforlag, 2012 and In the Beginning Was the Pun: Comedy and Humour in Samuel Beckett’s Theatre, Aalborg University Press, 2013. In 2013, Aalborg University Press named her Author of the Year. She is currently involved in several research projects examining artistic creativity, arts integrated educational designs in schools and the role of emotions in learning.

SUMMARY

All children, regardless of age, gender, geographical and social background, whether they are well functioning or mentally disabled, thrive under the same conditions for well-being, and learn if they thrive. The challenges that our society is experiencing, make creativity and job satisfaction basic needs that we cannot ignore.

This book is aimed primarily at the creative school and its brave defenders in a joint effort to continue to further develop the well-functioning elements and find new creative ways to meet our children’s needs for learning, development, confidence and positivity.

The purpose of this book is to inspire the teachers who believe that creativity should be a central focus in school, and that artistic creativity can greatly contribute to a more creative and reflective school. This inspiration is offered in the form of cases and examples illustrating the significant benefits that the integration of arts in teaching offers, such as positive emotions and cognitive intensity, but also in terms of concrete, effective practical tools.

CONTENT

Foreword by Shari Tishman
Foreword to the original 2012 Danish version. Jørgen Lyhne
Acknowledgments
Introduction
How can we make sense of it?
The creative effort
Artfulness: An artistic way of thinking about learning
   What is Artfulness
   Artfulness in school
   Why Artfulness?
   The biological and psychological perspective
Positive emotions
   Joy
   Engagement
   Flow
   Anything goes?
   Teachers’ own positive emotions
Cognitive Intensity
   Numeracy and literacy subjects
   Technical tools from the various art forms
   Mindset
   Teachers’ own cognitive challenges
Art experiences and learning

How do we achieve it?
How to integrate the arts in education
   Creativity
   Design
   Animation film
   Colouring book
   Play/games
   Drama: Science theatre
   Expeditionary Learning: hydrogeology
   Mindfulness
   Learning in museums

How can we evaluate it?
   Theoretical perspectives
   Inspiration for your own (re)search
