**Table of Contents**

**Introduction**

0.1 Introduction to the Handbook: Human-Computer Interaction Yesterday, Today, and Tomorrow  
Kent Norman, Department of Psychology, University of Maryland

**Part 1: Design Issues**

1.1 Interactive Critical Systems and How to Build Them or: Why User Interfaces Need Both Formal Methods and Human Factors  
Harold Thimbleby, Swansea University, UK

1.2 Semiotics and Human-Computer Interaction  
Clarisse Sieckenius de Souza, Departamento de Informática, PUC-Rio

1.3 Benefiting from ISO Standards  
Nigel Bevan, 12 King Edwards Gardens, London, W3 9RG

1.4 Gender and HCI  
Bimlesh Wadhwa, Department of Anthropology Memorial University of Newfoundland St. John’s, Newfoundland, Canada  
Samantha Breslin, Department of Computer Science National University of Singapore, Singapore

1.5 Digital Typography  
Peter Flynn, University College Cork, Ireland

**Part 2: Design Process**

2.1 Agile User-Centered Design  
Tedd Hellmann, Frank Maurer, University of Calgary

2.2 Ethnographic Approach to Design  
Dave Randall, Mark Rouncefield, Manchester Metropolitan University, Lancaster University, UK

2.3 User Modelling  
Pradipta Biswas, Indian Institute of Science, Bangalore, India  
Mark Springett, Middlesex University, London, UK

2.4 Kids and Design  
Mona Leigh Guha, Jerry Alan Fails, iSchool, University of Maryland

**Part 3: Evaluation Factors**
3.1 User Experience  
Jakob Simonsen, University of Copenhagen  

3.2 Task Load and Stress  
Julien Epps, NICTA, Australia  

3.3 Comparing Mobile Experience  
Xiaoge Xu, The University of Nottingham, Ningbo, China  

3.4 Factors of Immersion  
Noirin Curren, Applied Psychology, University College Cork, Ireland  

**Part 4: Evaluation Methods**  

4.1 Usability Testing  
Sirpa Riihiaho, Aalto University, Finland  

4.2 Remote Usability Testing  
John Black, Harmonia Holdings Group, LLC, Blacksburg, Virginia  

4.3 Applied User Research in Games  
Randy J. Pagulayan, Daniel V. Gunn, Jerome R. Hagen, Deborah J. O. Hendersen, Todd A. Kelley, Bruce C. Phillips, J23024 J. Guajardo, and Tim A. Nichols, Microsoft Game Studios, One Microsoft Way, Redmond, WA  

**Part 5: Input/Output**  

5.1 Fitts’ Law  
Scott MacKenzie, Department of Electrical Engineering and Computer Science at York University  

5.2 Principles for Designing Body-Centred Auditory Feedback  
Ana Tajadura-Jimenez, University College London  

5.3 Input Device - Motion Capture  
Atsushi Nakazawa, Takaaki Shirator, Kyoto University, Japan  

5.4 Applications of Intelligent and Multimodal Eye Gaze Controlled Interfaces  
Pradipta Biswas,  
Pat Langdon, University of Cambridge, UK  

5.5 Corneal Imaging  
Christian Nitschke, Atsushi Nakazawa, Kyoto University, Japan
Part 6: Interfaces

6.1 Multi-Surface Environments  
Teddy Seyed, Frank Maurer, University of Calgary

6.2 A Natural Language Interface for Mobile Devices  
Boris Katz, Gary C. Borchardt, MIT Computer Science and Artificial Intelligence Laboratory

6.3 Visual Query Interfaces  
Tiziana Catarci, Massimo Mecella, Sapienza Università di Roma, Italy  
Stephen Kimani, Jomo Kenyatta University, Kenya  
Giuseppe Santucci, Sapienza Università di Roma

6.4 Interfaces for Music  
Ben Challis, Manchester Metropolitan University, UK

Part 7: Interaction

7.1 Embodied Conversational Agents  
Hung-Hsuan Huang, College of Information Science & Engineering, Ritsumeikan, Japan

7.2 Interacting with Mobile Media  
S. Shyam Sundar, Eugene Cho, Jinping Wang, Pennsylvania State University

7.3 Natural Human Robot Interaction  
Yasser Mohammad, Assiut University, Egypt, JSPS Fellow in Kyoto University, Japan

7.4 A Quick Look on Game Engagement Theories  
Chaklam Silpasuwanchai, Xiangshi Ren, Kochi University of Technology

Part 8: Accessibility

8.1 Accessibility  
Alistair Edwards, Alternative Interfaces Group, University of York, UK

8.2 Designing for and with People Living with Challenging Circumstances  
Kellie Morrissey, John McCarthy, University College Cork, Ireland

8.3 Innovative Accessible Interfaces  
Carlos Duarte, David Costa, Luís Carriço, Universidade de Lisboa, Portugal
8.4 A Concrete Example of Inclusive Design: Deaf Oriented Accessibility
Claudia Savina Bianchini, Fabrizio Borgia, Maria De Marsico,
Sapienza University of Rome, Department of Computer Science

Part 9: Social

9.1 Social Networking
Jen Golbeck, iSchool, University of Maryland

9.2 Measuring Attitudes Online: Social Interaction and the Internet
Mary Joyce, Eve Griffin, University College Cork, Ireland

9.3 Munchausen by Internet
Aideen Lawlor, University College Cork, Ireland

Part 10: Communities

10.1 The Viability of Online Communities and Virtual Teams for Enterprise Clients
Tharon Howard, Clemson University, South Carolina

10.2 HCI and Education: Designing for Technology-Enhanced Learning Experiences
June Ahn, Tamara Clegg, University of Maryland

10.3 Digital Citizen Science and the Motivations of Volunteers
Charlene Jennet, Anna L. Cox, University College London Interaction Centre, UK

Part 11: Applications

11.1 Motor Vehicle Driver Interfaces
Paul A. Green, University of Michigan, Transportation Research Institute

11.2 Improving Ad-Interfaces with Eye Tracking
Michel Wedel, Department of Marketing, University of Maryland

11.3 The Quanitified Self
Jeong-Ki Hong, Jun-Dong Cho, Sungkyunkwan University, Suwon, Korea

11.4 A HCI Approach in Contemporary Healthcare and (Re)habilitation
Anthony Brooks, Aalborg University, Denmark
11.5 Visual Analytics for Comparing Multiple Clustering Results of Bioinformatics Data

Sehi L'Yi, Bongkyung Ko, DongHwa Shin, Young-Joon Cho, Jaeyong Lee, Bohyoung Kim, Jinwook Seo, Seoul National University, Korea
