Toward Best Practices for Public Acceptability in Wave Energy:

Issues Developers Need to Address

ISSUES TO ADDRESS	DESCRIPTION
CONFLICTS OF USE	<ul style="list-style-type: none"> Commercial fishing Recreational fishing & boating Surfing
ENVIRONMENTAL IMPACT CONCERNS	<ul style="list-style-type: none"> Bottom species habitat Marine mammals & other species, including birds Entanglement Reproduction Migration
NIMBY ISSUES	<ul style="list-style-type: none"> Visual impact Noise impact Aesthetic impact
COMMUNITY WELL-BEING CONCERNS	<ul style="list-style-type: none"> Employment Income Benefits / costs Tourism

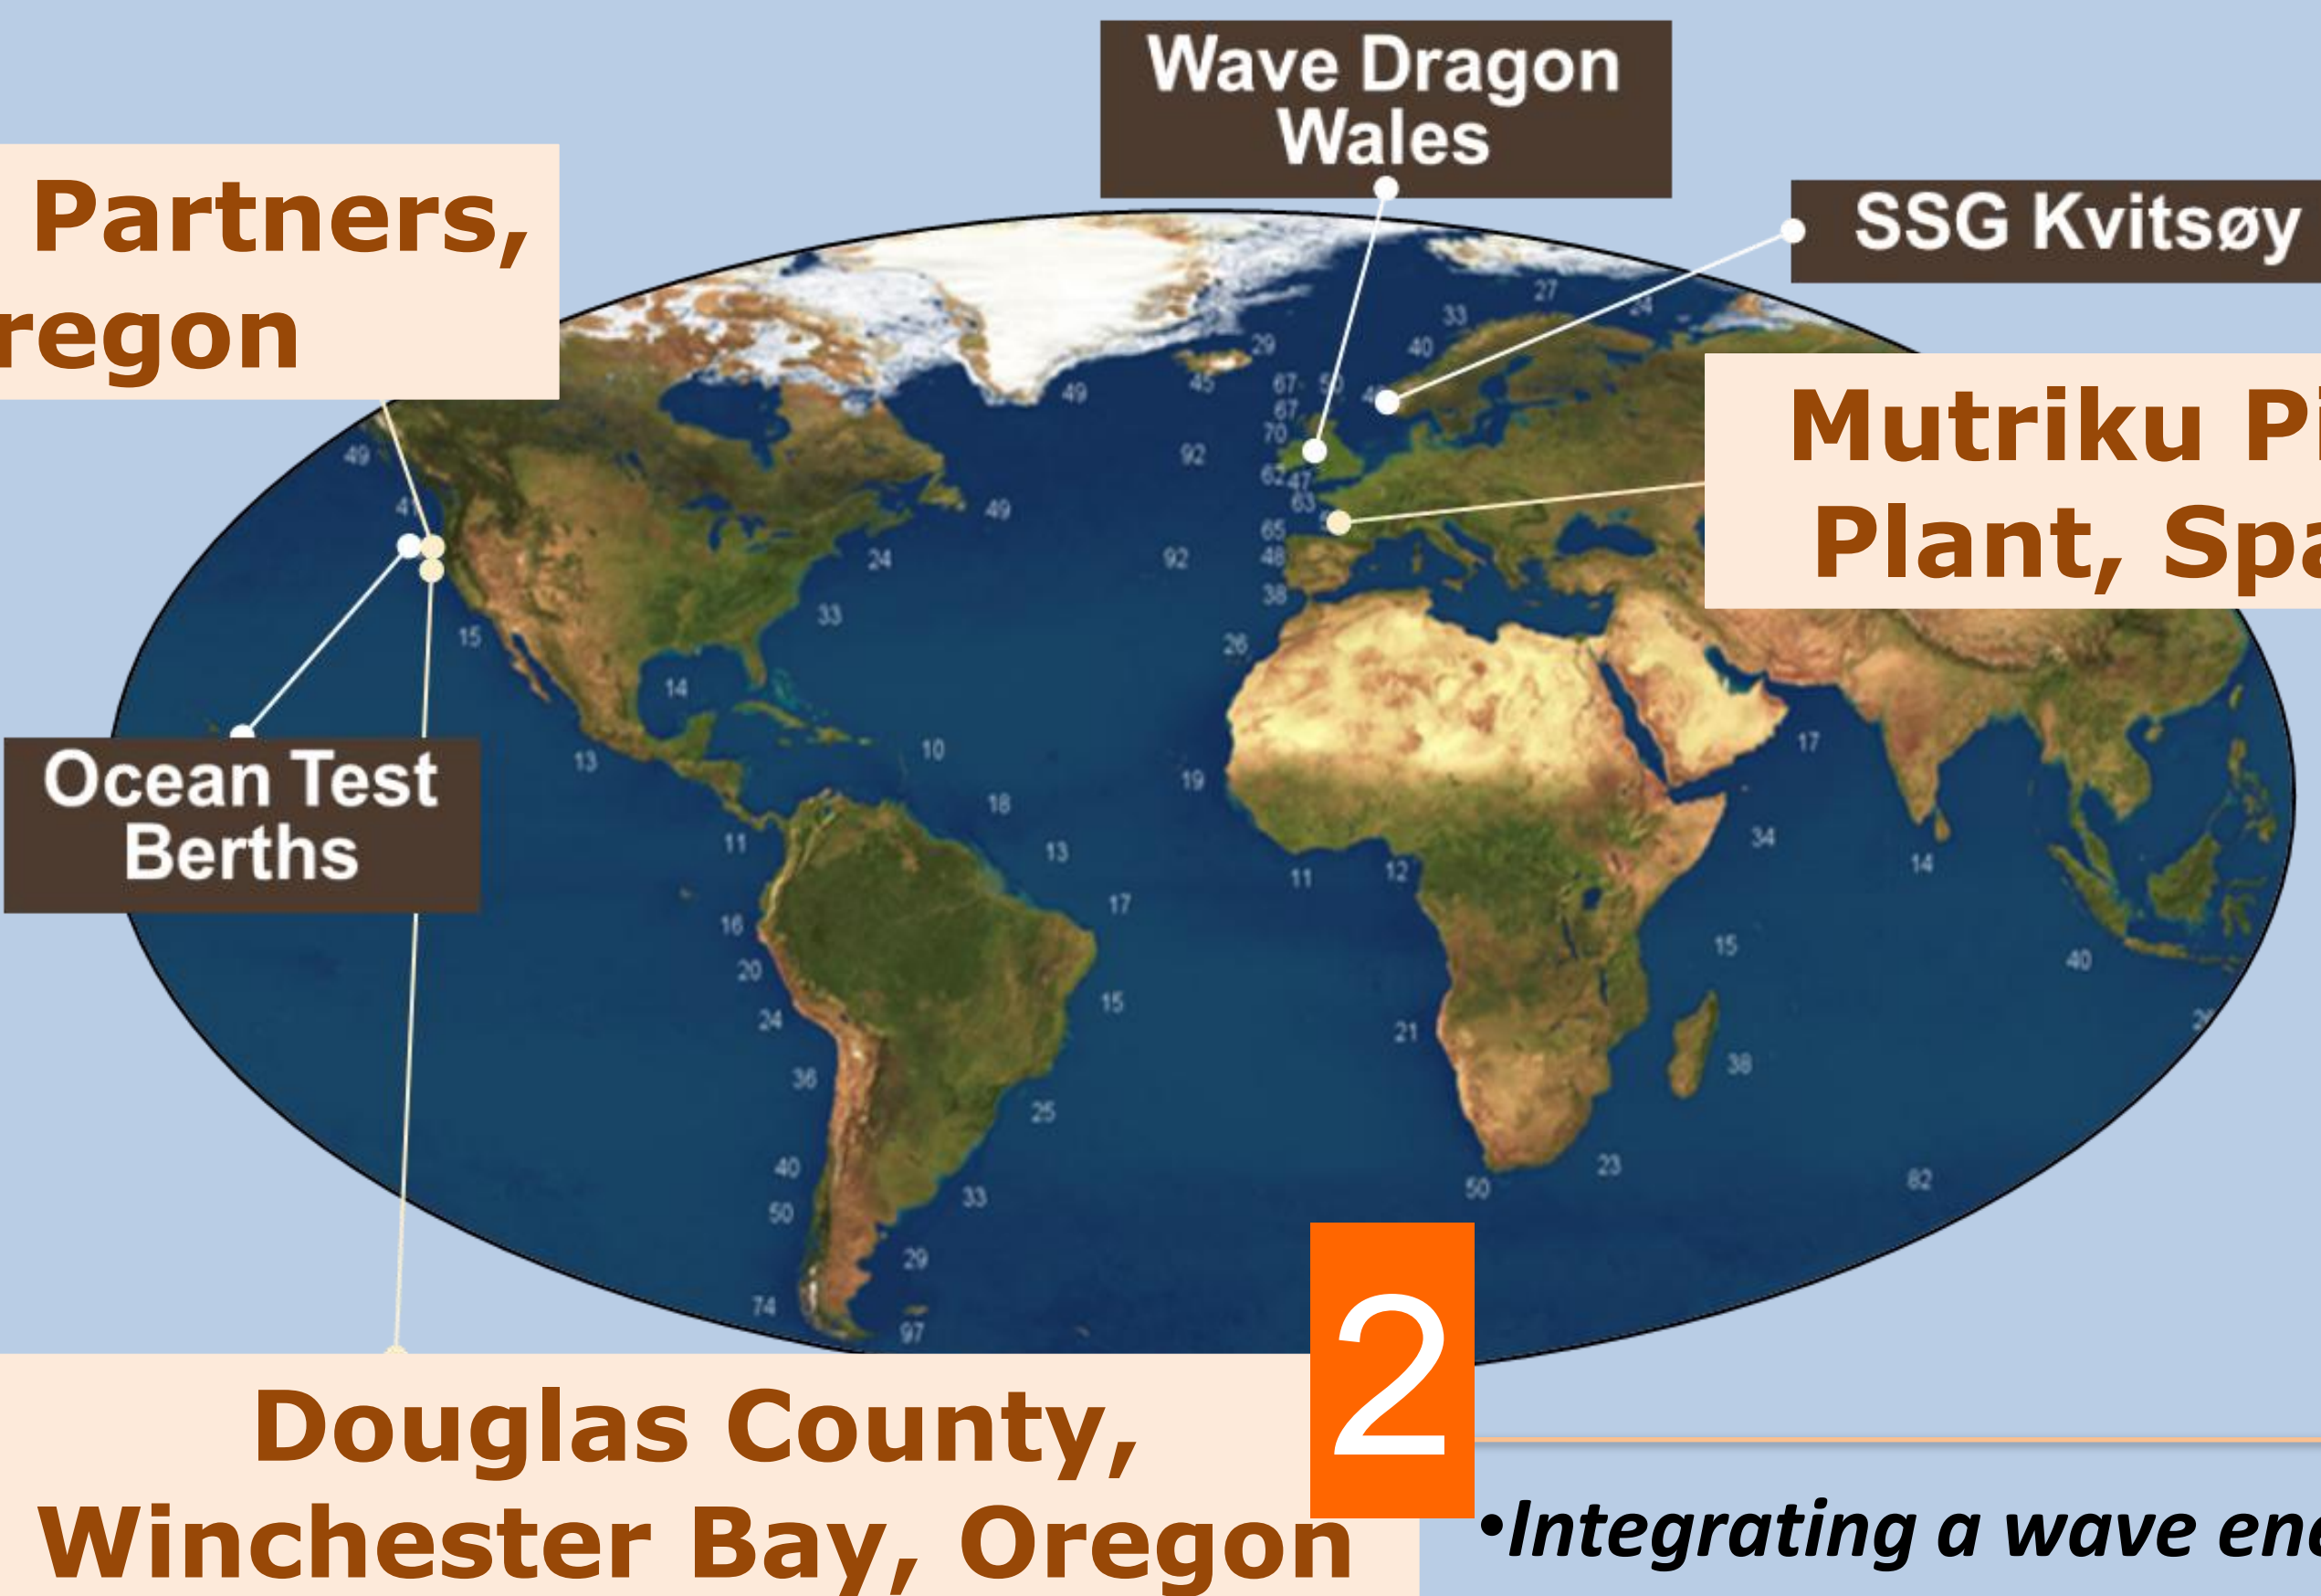

BEST PRACTICES

"Achieving a positive endorsement of wave energy projects among stakeholders without alienating key members of the local to the project communities."

3 CASE STUDIES

1 Columbia Energy Partners, Tillamook, Oregon

- County obtained preliminary permit
- Early meetings with TIDE & FACT members
- Fishermen objections: lost fishing & crabbing grounds; block transit routes & crowd North Coast waters with displaced fishermen; aesthetic concerns; concerns on heat of undersea cables reducing fish stocks.
- Agreement terminated

- Integrating a wave energy plant into a breakwater
- Few engagement practices
- Major event after a storm producing loud noise that could be heard 3-10 km away
- Main opposition from the Green Party
- Fishermen support
- Increased tourism flow
- To be operational by mid Oct. 2010

LESSONS LEARNED

- Public involvement should be a combined effort by the developer and the local authorities
- Acceptance increases after construction
- Explore the issues in an open environment and identify them early; be flexible in communicating
- In the presence of strong fishermen opposition – reconsider
