INNOVATION FOR SUSTAINABILITY African and European Perspectives

Editors: Mammo Muchie and Angathevar Baskaran
ISBN: 978-0-7983-0346-0
Size: 245 x 170mm
Extent: 198 Pages
Price: R150.00
Availability: January 2013
Co-Published by AISA, TUT and AALBORG UNIVERSITY

The innovation system theory has to deal with climate change as it generates the intellectual tools to promote development. A unified innovation system theory that integrates the eradication of threats to nature with the promotion of development is critically important to advance an original pedigree and trajectory of epistemology. Africa must learn and appreciate the costs to itself from the way Europe industrialised. It can neither follow nor imitate the European pattern of industrialisation. It has to include in its own development agenda both the meeting of social needs and choosing a path of development that would not bring ecological harm in the process. The African innovation system has to evolve in a nature protecting – rather than hurting – system; in addition, social needs must be met rather than exacerbating the social inequalities path of development.

Council

Dr. B. Hlatshwayo (**Chairperson**), Prof. N. B. Biekpe, Dr. J. Daniel, Dr. K. S. Kongwa, Dr. T. Sidzumo-Mazibuko, Prof. Y. Sadie, Prof. N. Bohler-Muller
Mrs. S. Padayachy, Dr. N. Ramdhani, Mr. M. Nkoli, Dr. T. Auf der Heyde, Dr. M. P. Matlou (**Ex-officio**)

Contents

Preface

Contributing authors

Introduction

Chapter 1

The Uptake of Environmentally Sensitive Innovation to Transform Production Systems in Sub-Saharan Africa

Mammo Muchie

Introduction

Case study of cleaner production examples from Tanzania

Example of cleaner production assessments in Zimbabwe

The significance of cleaner production from the few cases in Zimbabwe

Problems of cleaner technology transfer into Africa

Conclusion: the uptake of ests in firms and industrial policy

Notes and references

Chapter 2

Climate Debt Owed to Africa: What to Demand and How to Collect?

Patrick Bond

Introduction

The choice of carbon trading versus climate debt

Demanding ecological and climate debt repayment

Africa united then divided on climate debt

Civil Society Ups The Ante

How should the debt be repaid?

Conclusion

Notes and References

Chapter 3

Education, Convergence and Carbon Dioxide Growth per Capita

Kinda Somlanare Romuald

Introduction

Literature review

Empirical analysis

Results

Robustness checks

Conclusion

Notes and references

Chapter 4

Green Markets of the Future: An Economic Opportunity also for Newly Industrializing Countries and South Africa?

Rainer Walz

Introduction

Conceptual issues

Technological capability of NICS in green technologies – publications

Disaggregated analysis for South Africa

Conclusion

References

Chapter 5

Science for the Future: Challenges and Methods for Transdisciplinary Sustainability Research

Martina Schäfer, Dörte Ohlhorst, Susanne Schön and Sylvia Kruse

Introduction

Characteristics of sustainability research and methodological challenges

Constellation analysis: a bridging concept for inter- and transdisciplinary research

Conclusions

Notes and references

Chapter 6

Conceptualizing Sustainable Development as a Global Problem: The Role of Strategic Knowledge

Britta Rennkamp

Introduction

Governance of knowledge

Knowledge for global problem solving

Multilateral and bilateral cooperation in science and technology for sustainable development

Linking bilateral scientific and technological cooperation to development

Strengthening sustainability oriented innovation systems

Linking cooperation lines: the German-South African dialogue for sustainability science

Concluding remarks

References

Chapter 7

Why Radical Innovations Fail: The Case of Technological Change in German Coal-fired Power Plants

Klaus Rennings, Peter Markewitz and Stefan Vögele

Introduction

Incremental and radical innovations from the perspective of evolutionary economics

Incremental and radical innovations in power plant technology in Germany

Supercritical coal-fired power plants as an incremental innovation

Carbon dioxide capture in power plants: radical or incremental?

Conclusions

References

Chapter 8

In Search of Green Knowledge: A Cognitive Approach to Sustainable Development

Andrew Jamison

It all started with steam cars

Change-oriented research

The cognitive approach

The hybrid imagination

References

Chapter 9

Innovation for Sustainability in a Changing World: The South African-German Dialogue on Science for Sustainability

Lothar Mennicken, Wolf Junker, Imraan Patel and Oksana Buranbaeva

South Africa and Germany in dialogue

Background: the role of the science policy dialogue

Linking sustainable development and innovation policy

The state of the South African–German bilateral cooperation in science for sustainability

The way forward

Chapter 10

The Ecological Economics Synthesis for Sustainability: Post Scriptum Conclusion

Mammo Muchie and Agathevar Baskaran
