## Forskningsprofil

**Mads Brath Jensen** is an Assistant professor at the Department of Architecture, Design and Media Technology at Aalborg University in Denmark. In his PhD study (2017-2021), he investigated design methods and procedures for establishing a direct relation between creative design processes in the field architecture and interactive robotic fabrication, with emphasis on how cognitive design processes are influenced by interactive real-time human-material-robot processes. Mads received his MSc.Eng. in Digital Design from Aalborg University in 2008 and has been teaching in the field of computational architecture, parametric design and rapid prototyping technologies on both BSc and MSc level (2008-2017). This research-based teaching has resulted in a series of research pavilions showcasing the interconnection between computational form-finding, material behaviour, thermal- and acoustic simulation, and fabrication techniques.
