co-hosted with WHO-Europe and Public Health Nutrition Research UK

15-16 May 2014

Abstract: This presentation is a wrap-up of the first day of the “School Food and Nutrition Policy in Europe: policies, interventions and their impact” workshop. It relates to some of the important questions asked in relation to moving forward of the school food agenda in the Member States. What can be done better? Which additional measures could be implemented? How can we as change agents take advantage of some of the tools for funding and policymaking already available. How can we take the complex food reality at school into account? How can we create better evidence? How can we improve monitoring and surveillance in the field. What do policymakers need to move the agenda forward? Who can help? How can we make sure that policymakers and research community can continue working together in this important field. These are some of the questions answered

Take European SMP diversity into account

Institution with meals for all

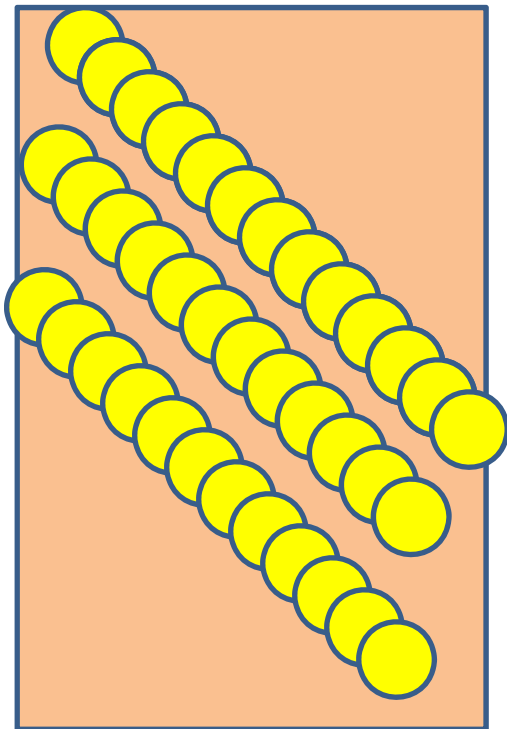

Institution with no meals for all

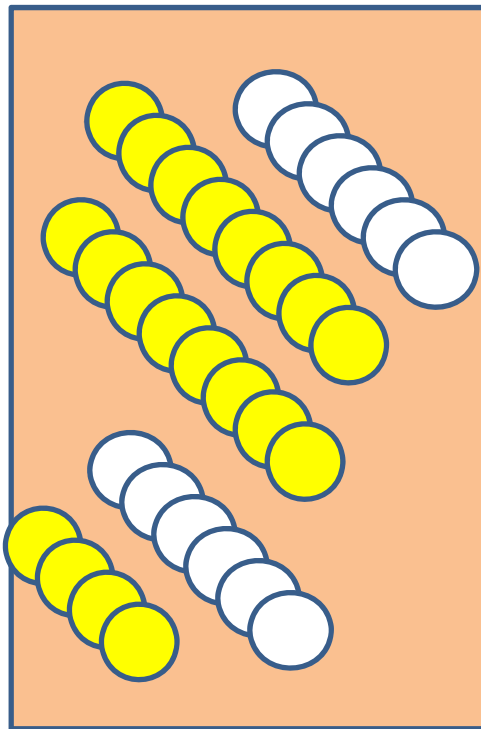

Institution with meals for some

Collective

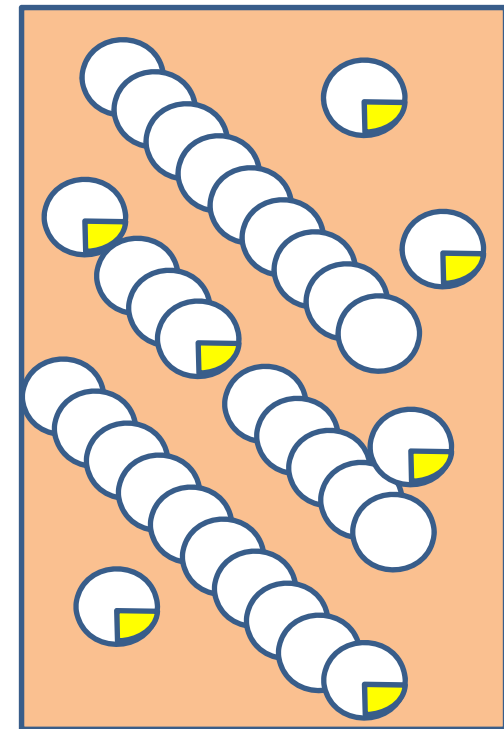

Example: SE; England & FI

Semi-Collective

Example: Kindergarten, DK

Non-Collective

Example: Schools, DK

Two doors of the school

Assess the action possibilities at school

The School Foodscapes Assessment Tool (S-FAT)

Environment/structures	Assessment of environment	Assessment of action possibilities
Food availability		
SMP (school meal program) available?		
School Fruit Scheme (SFS) available		
School Milk Scheme (SMS) available		
Presence of unofficial " <u>skole bod</u> " with		

"Foodies"/Stakeholders/Agents	Priorities	Activities that could support priorities	Assessment of action possibilities
Head teacher			
Teaching staff			
Canteen staff			
Janitor staff			
Parents board			
Home economics teaching staff			
Municipal school <u>adm</u> staff			
PE/Outdoor activity teaching staff			
Municipal procurement			

New arrivals in SFS version2.0

**75 -90 % community
aid for F&V provision
and accompanying
measures**

Accompanying measures

The following costs, which shall be directly linked to the School Fruit Scheme, are eligible for the Union aid:

- costs associated with the implementation of agriculture and food-related measures, such as costs of **organising tasting classes**, setting up and **maintenance of gardening sessions**, organisation of **farm visits** and similar;
- costs related to the measures aimed at **educating children** about agriculture, **healthy eating habits** and environmental matters related to the **production, distribution and consumption of** fruit and vegetable products;
- costs associated with the implementation of other measures that are carried out in order to support the distribution of products and that are line with the objectives of the School Fruit Scheme.

Evidence & monitoring

develop methodologies for measurement of

- Methodologies for measurement of
- Intake
- Uptake
- Cost effectiveness
- Feasibility
- Appreciation
- Data'n devices

School Outreach community links

www.sol-bornholm.dk

Use whats already there

- COST.EU
- JPI
- ERA
- Joint Actions
- EU SFS (SFVS) DG Agri
- SMS DG Agri
- Erasmus+/Comenius
- H2020

Conclusions

- Use the policy and funding tools already there
- Develop methodologies, monitoring, intake, cost effectiveness, data'n devices
- Understand the diversity in European SMP approaches
- Understand the "learning" ethos of the school
- Consider reaching out to communities
- Consider involving non-public actors, NGO's partnerships etc
- Consider the potential of accompanying measures, hands-on-food-activity (HOFA's)

Actions/Next stops

- Summerschool "European summer school on food & nutrition strategies at school"
- COST action?
- More meeting opportunities: London, Ispra, next stop ??
- Methodology development/common protocols?
