## **Welcome Message from International Society of Sport Psychology**

ISSP had held six World Congresses and after 24 years it was decided look elsewhere than the European and North American continents for the next congress site. An obvious location was Asia. It was in 1989 that the 7<sup>th</sup> ISSP World Congress of Sport Psychology was held in Singapore following the vision of Robert (Bob) Singer, the ISSP president at the time, to geographically expand the horizon, the contributions, and leadership of ISSP.

Our Society was founded in 1965, in Rome, Italy, by Ferruccio Antonneli during the 1<sup>st</sup> World Congress, which he also organized. Antonneli became the first president of ISSP.

The initial six World Congresses corresponded to the scientific and cultural centers of International sport psychology. However, President Singer had established as one of his main goals to promote ISSP and sport psychology in other areas of the world. Therefore, among other actions, he encouraged the ISSP Managing Council to approve the decision of organizing the 1989 World Congress in Singapore. The aim was to stimulate Asian countries to become more advanced in the development of sport psychology as to academic study, research, and applications. In addition, another goal was to assist these countries in becoming more aware of such matters in other parts of the world. At that point of time, there was a lack of understanding in many Asiatic countries of developments in sport psychology in other parts of the world, in spite of educational, economic, and technological advancements occurring in the region.

Twenty-four years later, the ISSP World Congress returns to Asia as a result of the scientific and professional advancements in sport psychology here. The current situation is completely different from 1989!

In fact, the three bids presented to the ISSP Managing Council four years ago to organize the 2013 Congress came from Asiatic Countries. Notwithstanding, all of them were excellent. Finally, Beijing was given the responsibility for organizing the Congress.

The 2013 Congress will be a great forum where the latest perspectives on theories and applications in the field of sport psychology will be presented and discussed. Many opportunities will be provided for interactions among and between scholars and students. Given the geographical area where the congress will be held, I expect a significant contribution from these countries as to scholarly and applied perspectives as influenced by the unique Asian culture. Indeed, the general theme indicates cultural tone: *Harmony in Excellence and Life!*

Contributions and collaborations in sport psychology are much more significant now, and China holds a significant position. I believe that the keynote lectures, symposia, and posters to be presented at the Congress will be of the highest quality. They will be very stimulating, generating exciting ideas that will contribute to the advancement of our field all over the world. Social opportunities will promote personal and professional networks linking colleagues from the five continents. Cultural experiences will enable us to examine different perspectives about sport psychology and people, with an enriched human perspective.

The Congress in July will be an outstanding event. I look forward to meeting you there!

## **Welcome Message from Local Organization Committee**

Dear Sidónio Serpa, the president of International Society of Sport Psychology,

Dear guests and friends in sport psychology,

It is a great honor for Beijing Sport University (BSU, with full support from the Sport Psychology Association under China Psychological Society and the Sport Psychology Association under China Society of Sport Sciences) to host the ISSP 13th World Congress of Sport Psychology. This congress will be a good opportunity for sport and exercise psychologists and people interested in this discipline to exchange their ideas and updated information on research findings and application work. This congress will also be a milestone for BSU in her 60 years' efforts to make contribution to the development of sport sciences, physical education and human welfare in large.

Beijing Sport University was founded on November 1st, 1953. It is directly under the General Administration of Sport of China and one of the key universities in China and also a "211" Project University, a national project initiated in 1995 by the Ministry of Education with the aim of cultivating 100 key colleges for the 21st century. Since its establishment, BSU has turned out more than 40,000 highly-qualified graduates specializing in various sports disciplines from both undergraduate and graduate programs, 30 gold medals in Olympic Games, contributing greatly to development of Chinese sport and physical education. And with years of improving process, BSU has enjoyed the fame as one of the first group of national universities, and one of top sport universities in the world.

Few cities in the world except Beijing have served as the political, educational and cultural centre of a country as immense as China for so long. The Encyclopædia Britannica describes it as, "One of the world's great cities," and declares that the city has been an integral part of China's history for centuries, and there is scarcely a major building of any age in Beijing that doesn't have at least some national historical significance. Beijing is renowned for its ancient palaces, temples, and huge stone walls and gates. Its art treasures and universities have long made the city a centre of culture and art in China.

We hope that the participants of this congress will have wonderful experiences in their academic exchanges, stay in BSU and visit to attractive places in Beijing and China.

May this congress be a successful one!

## 9. Weather/Climate

July is not only the hottest but also the wettest month in Beijing, with temperatures reaching up to 36°C (96.8 °F) during the day accompanied with a moderate rainfall of 185 mm (7 inches). Thunderstorms are frequent along with sudden torrential rain. Due to the high temperature and humidity, Beijing has 'sauna' days towards the end of July (when it is so hot, excessive perspiration leads to soaking wet clothes).

Sunscreen, sun-tan oil, lotion, cream, and rain gear are very important for a trip to Beijing at this time.

## 10. ATM/Cash Exchange

ATM/Auto cash machine, which is the Postal savings bank ATM, located in the opposite side of the Beijing Sport University Hotel. There is another ATM (China CITIC Bank) near the southeast door of BSU, accept MasterCard & Visa credit cards.

Outside of the Beijing Sport University, cash exchanges can be made in many banks which can be found on the map below. All the banks will be available from 9:00 to 17:00 daily for exchanging major currencies into Chinese Yuan - RMB. Some banks need your passport before the currency exchange.
