THREE CATEGORIES IN ENTREPRENEURSHIP

Entrepreneurial Personality in relation to being self-employed, business owner and entrepreneur

SELF-EMPLOYED

The self-employed is characterised by autonomy in one-man-enterprises in well-known types of businesses.

They earn their own salary and pay a number of helpers, pay taxes and maintain subcontractors.
Generally, they cause no trouble for society.

They praise their freedom to determine pace, amount and kind of work

BUSINESS OWNER

The business owner runs a business: individual, team, family or group-launched business consisting of various employees.

They are in charge of allocating the skills of employees and ensure steady revenue to selected stake-holders.

They operate with enough incremental development to keep the business running. Growth is not a goal in itself

ENTREPRENEUR

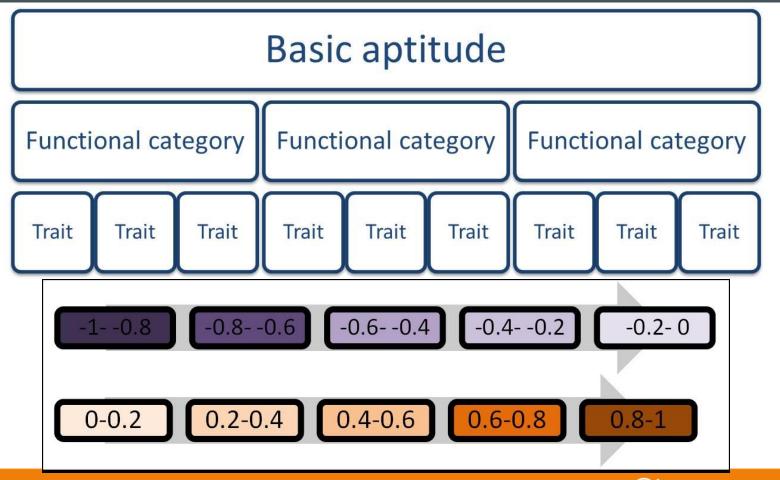

The entrepreneur constantly launches ideas, usually several at the same time.

They are entrepreneurial throughout life, however, the activity might change to e.g. charity finding better solutions.

Sometimes, they slow down due to life issues and settle as business owners or equivalent maintaining next generation of growth endeavours
