

Unpaywall – den alternative DOI resolver

Kasper Løvschall

AALBORG UNIVERSITET

This means
it's free.

Hvad er Unpaywall?

- ▶ Browserplugin der finder parallellpubliceret Open Access fuldtekst direkte ude hos leverandøren
- ▶ "It's fast, free, and legal."

Built with ❤ at Impactstory
with support from the National
Science Foundation and the Alfred
P. Sloan Foundation.

Welcome to Unpaywall! When you see the **green tab** beside a research article, click it to read the full text.

Frequently asked questions

How often does Unpaywall find full text?

Overall, Unpaywall users find fulltext for 47% of articles. You may get different results, depending on the age and topic of the articles you're reading. There's more information on how we found these numbers in [this paper](#). This success rate will improve as we tweak our algorithm and as mandatory open access requirements take effect in the [US](#), [UK](#), [Europe](#), and elsewhere.

How do you find all these fulltext articles?

We harvest content directly from thousands of open-access repositories worldwide. We also use great open data from [PubMed Central](#), [the DOAJ](#), [Crossref](#) (particularly their license info), and [DataCite](#).

Så forsvandt oaDOI lige der ...

- ▶ Unpaywall lå ovenpå oaDOI

Does Unpaywall have an API?

Yes! We make all of Unpaywall's data available via the [oaDOI API](#). The oaDOI service is currently used to enrich hundreds of academic libraries, search engines, indexing services, and other tools; it's also used in many research and evaluation projects.

- ▶ Nu er det det samme – næsten ...
- ▶ oaDOI er også en DOI resolver som dx.doi.org:
- ▶ <http://oadoi.org/10.1111/j.1467-9655.2004.00205.x>
- ▶ <http://dx.doi.org/10.1111/j.1467-9655.2004.00205.x>

cloud.google.com

▶ Promoveret

Hvis du missedede det

Unpaywall Data @unpaywall_data · 1d

News! As of today, we're retiring the name oaDOI. All its services/features will continue to work, but now they're part of larger Unpaywall project. Reason: saves us time and effort explaining how Unpaywall and oaDOI relate. The relation is now: "same project." :)

Jason Priem @jasonpriem · 2d

I will keep beating this drum forever: a citation is A NOISY, SOCIAL TRANSACTION, not a (merely) a precise, objective particle. Citation-based metrics MUST be used with this in mind. The same is true of [#altmetrics](#). This is a feature not a bug.

But the news is good: over the last year, several efforts are emerging to cover that last mile. Our contribution was [Unpaywall](#): an extension that shows a green tab in your browser on articles where there's an OA version available. [Unpaywall has enjoyed lots of success, adding over 100,000 active users in under than a year. Moreover, the backend database of Unpaywall \(formerly called oaDOI\) can be integrated into any number of existing tools, making it easier to spread OA content all over the place. For instance, we're already seeing over a million uses every day from library link resolvers.](#)

<http://blog.impactstory.org/>

Integration direkte i link-resolver

Hvorfor er det vigtigt?

- Ikke alle bruger en Unpaywall-browserplugin
- Link-resolveren møder brugeren
- Vi har ikke altid licens til det ønskede materiale
- Vi har brugere, der ikke har nødvendige rettigheder
- Vi sender et signal og promoverer OA

4 Resultater for materialer på biblioteket

Integration direkte i link-resolver

There are lots of ways you can use the Unpaywall dataset in your own projects, depending on what you're trying to do:

- **Librarians:** can integrate Unpaywall into their [SFX](#) or [360 Link](#) link resolvers, so library users can read OA copies in cases where there's no subscription access. Over 1000 libraries worldwide are now using this now.

Out-of-the-box integration i SFX og 360 Link

Hvordan ser et API kald mon ud?

- ▶ Unpaywall har et REST API til fri brug
- ▶ **“Representational state transfer (REST) or RESTful web services are a way of providing interoperability between computer systems on the Internet. REST-compliant Web services allow requesting systems to access and manipulate textual representations of Web resources using a uniform and predefined set of stateless operations.”**
- ▶ Selvom API'er typisk er til programmatisk brug, kan de almindeligvis bruges af alm. mennesker med browser
- ▶ Brug og vilkår: <https://unpaywall.org/api/v2>
- ▶ Kald: <https://api.unpaywall.org/v2/10.1108/10748120110424816?email=kl@aub.aau.dk>

API version 1 problemer

- ▶ Særdeles uforudsigelig svartid på op til +7 sekunder
- ▶ SFX timer ud efter 5 sekunder
- ▶ Lægger dermed potentielt stort tidsoverhead på alle opslag m. DOI
- ▶ Kunne løses m. et asynkront AJAX kald i browser og efterfølgende opdatering af siden
- ▶ Kan dermed også anvende indholdet i svaret fra API'et til f.eks. bedre information ...

Kasper Løvschall

@lovschall

@oaDOI_org overwhelmed by success or is the API generally very slow ~7 sec/req? Would love to go live with you API...

1:20 PM - 4 Nov 2016

Add another Tweet

Unpaywall Data @unpaywall_data · 7 Nov 2016

Replying to @lovschall

Yup, is sometimes 7seconds. For many requests we are checking repo/publisher pages that can take that long to download :(

Kasper Løvschall @lovschall · 7 Nov 2016

Thanks for the answer :) Think I must look into some AJAX solution for the API to be perfectly integrated into SFX. Thnx again!

For OA er ikke bare OA

- ▶ Gold / Green / Bronze OA
- ▶ Er det peer reviewed eller ej?
- ▶ Er det identisk med forlagsversionen?

Hvordan kan vi sætte vores egen OA i spil?

- ▶ Unpaywall er dybt afhængig af DOI'er
- ▶ Tjek at Unpaywall kender vores repository (se <http://unpaywall.org/sources>)
- ▶ Skal vores egen OA tilgængeliggøres skal vi sikre, at publisher-DOI'erne altid registreres i f.eks. Pure
- ▶ Vi skal selvfølgelig også oprette DOI'er på publikationer, der ikke har tildelt et i forvejen
- ▶ Med DOI muliggør vi også f.eks. tracking mht. altmetrics
- ▶ Vi kan foretage kvalitetskontrol med datasættet
- ▶ DROP FOR F..... LOGIN!
- ▶ DEN DANSKE FORSKNINGSDATABASE!!!

The cellulose synthase companion proteins act non-redundantly with CELLULOSE SYNTHASE INTERACTING1/POM2 and CELLULOSE SYNTHASE 6.

Endler, Anne · Schneider, Rene · Kesten, Christopher · Lampugnani, Edwin R. · Persson, Staffan

In: Plant signaling & behavior, Vol. 11, Iss. 4, 2016

Online full-text access is available at the following Danish Research and Educational Libraries:

Det Kgl. Bibliotek / AU Library Library Homepage Branches	Walk-in use Online
DTU Library / Technical Information Centre of Denmark Library Homepage Branches	Walk-in use Online
University Library of Southern Denmark Library Homepage Branches	Walk-in use Online
Aalborg University Library Library Homepage Branches	Walk-in use Online
The Royal Danish Library / CULIS - RUB Library Homepage Branches	Walk-in use Online

If you are an employee or student associated with one of the above libraries, you can use the direct link to online full-text. If not, the libraries offer so-called *walk-in use* where you can access the full-text free of charge from within the library building. This option is particularly useful to persons with no affiliation to the libraries.
