Scientific Publications at the Department of Civil Engineering

Technical Reports are published for timely dissemination of research results and scientific work carried out at the Department of Civil Engineering (DCE) at Aalborg University. This medium allows publication of more detailed explanations and results than typically allowed in scientific journals.

Technical Memoranda are produced to enable the preliminary dissemination of scientific work by the personnel of the DCE where such release is deemed to be appropriate. Documents of this kind may be incomplete or temporary versions of papers—or part of continuing work. This should be kept in mind when references are given to publications of this kind.

Contract Reports are produced to report scientific work carried out under contract. Publications of this kind contain confidential matter and are reserved for the sponsors and the DCE. Therefore, Contract Reports are generally not available for public circulation.

Lecture Notes contain material produced by the lecturers at the DCE for educational purposes. This may be scientific notes, lecture books, example problems or manuals for laboratory work, or computer programs developed at the DCE.

Theses are monograms or collections of papers published to report the scientific work carried out at the DCE to obtain a degree as either PhD or Doctor of Technology. The thesis is publicly available after the defence of the degree.

Latest News is published to enable rapid communication of information about scientific work carried out at the DCE. This includes the status of research projects, developments in the laboratories, information about collaborative work and recent research results.

Laboratory practise

The Laboratory practise is prepared according to information provided in http://www.en.ses.aau.dk/Study+Boards/Civil+Engineering/Laboratory+practice where the latest information about the safety in the laboratory can be found.

Laboratory building L (Sohngaardsholmsvej 57)
The L building is open from 7:00 – 16:00, on Monday to Friday. Outside these hours, you must use the AAU student’s card. Building supervisors (Da. betjente) can activate the card to work in the L building. They are available in Sofiendalsvej 11 several hours every week. More information can be found in http://www.en.aaucard.aau.dk/students/access_card/

Working hours of the Laboratory staff:
- Mondays-Thursdays, 8:00-16:00,
- Fridays, 8:00-13:00.

Access to various test equipment is normally locked outside of the Laboratory staff working hours. If needed, a key can be borrowed.

General rules in the laboratory
Eye rinsing fluid is placed by the sinks in the labs, and an emergency shower is available in the foundation lab. Furthermore, at the entrance of the foundation lab, there is a first aid kit, defibrillator, stretcher and a fire hose. Be aware of the location of the first aid kits when you are in the laboratory.

General safety rules:
- You should always use safety shoes when working in the laboratory.
- Always read the related specifications and manuals before using the equipment.
- Ask laboratory staff for information if you are in doubts.
- Always ask for the necessary instructions regarding the use of equipment and tools.
- Clean and return a tool after borrowing it.
- Clean after yourself.
- If a tool/equipment breaks or error message appears on it, contact the laboratory staff.
- Consider others working in the laboratory.
- It is prohibited to eat or drink in the laboratory.

Contact persons
The full list of the Laboratory staff can be found by the entrance to the L building.

Head of Laboratories, Benjaminn N. Nielsen, tel. 9940 8459, bnn@civil.aau.dk.

Laboratory key, Kurt S. Sørensen, tel. 2369 4014, kss@civil.aau.dk.
Safety instructions for the Test Set-up

The following information is provided particularly for the test set-up “cos(Kristina)”. However, it is similar to other foundation testing rigs in the AAU Geotechnical Laboratory.

**Safety equipment**

<table>
<thead>
<tr>
<th>Equipment</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Safety shoes</td>
<td>To wear all the time.</td>
</tr>
<tr>
<td>Helmet</td>
<td>To wear when working directly with the testing rig, sand box and operating the crane.</td>
</tr>
<tr>
<td>Safety sling</td>
<td>To wear when standing on the sand box edge, fastening the hydraulic cylinders, climbing on the top of the testing rig.</td>
</tr>
<tr>
<td>Earmuffs/Earplugs</td>
<td>To wear when vibrating</td>
</tr>
<tr>
<td>Vibration gloves</td>
<td>To wear when vibrating</td>
</tr>
<tr>
<td>Gloves</td>
<td>Recommended to wear as protection against splinters or the like</td>
</tr>
<tr>
<td>Knee protections</td>
<td>Recommended to wear when vibrating</td>
</tr>
</tbody>
</table>

**Safety rules during the testing procedure**

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Equipment required / recommended</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Loosening sand</td>
<td>Safety shoes / Gloves.</td>
<td></td>
</tr>
<tr>
<td>2. Vibrating</td>
<td>Safety shoes, vibration gloves, helmet, earmuffs or earplugs / Knee protections, safety sling.</td>
<td>1h of vibration is followed by 1h of other type work.</td>
</tr>
<tr>
<td>3. CPT testing</td>
<td>Safety shoes, helmet / Gloves, safety slings.</td>
<td></td>
</tr>
<tr>
<td>5. Operating crane</td>
<td>Safety shoes, helmet / Gloves.</td>
<td></td>
</tr>
<tr>
<td>6. Working with the MOOG system</td>
<td>-</td>
<td>Body parts, such as hands and fingers, can never be under the MOOG cylinder when the</td>

</tbody>
</table>
Consequences for the health
Testing procedure requires precaution at all times. Continuous physical and mental work results in fatigue. Therefore, it is important to take breaks and keep hydrated.

The following table describes injuries which can be caused if the previously described safety rules are not kept.

<table>
<thead>
<tr>
<th>Equipment</th>
<th>Consequence if not used</th>
</tr>
</thead>
<tbody>
<tr>
<td>Safety shoes</td>
<td>Feet or toe punctures, crushing, sprains, and lacerations. More information on <a href="http://www.ccohs.ca/oshanswers/prevention/ppe/foot_com.html">http://www.ccohs.ca/oshanswers/prevention/ppe/foot_com.html</a></td>
</tr>
<tr>
<td>Vibration gloves</td>
<td>Painful and disabling disorders of the blood vessels, nerves and joints, hand-arm vibration syndrome (HAVS), carpal tunnel syndrome. More information on <a href="http://www.hse.gov.uk/vibration/">http://www.hse.gov.uk/vibration/</a></td>
</tr>
<tr>
<td>Gloves</td>
<td>Splinters, infections.</td>
</tr>
<tr>
<td>Knee protections</td>
<td>Ligament sprains, muscle and tendon injuries.</td>
</tr>
</tbody>
</table>
