

Nem brugeradgang til Open Access-indhold ved hjælp af bl.a.  
OA knap og Unpaywall

Kasper Løvschall – DEFF-konferencen 2018

# Nem Open Access?

*"As digital consumers we have long taken for granted the idea of getting music, video, news, and even our groceries, at the click of the button. Why then, even when all systems are working as they should, does it still take somewhere between 5 and 15 clicks to access journal article PDFs? Endlessly 'chasing links', waiting for laggy redirects, and (re-)completing login forms are taken as a matter of course in academic literature searches. I am confident that these practices will one day be missed no more than modem dial-tones and 'Asking Jeeves'."*

Ben Kaube • 2nd

# Bens observationer

- ⦿ Der er altid en vej til PDF'en for den "tilpas" determinerede forsker
- ⦿ Vejen kan dog være upraktisk, omstændelig og ende i en gråzone
- ⦿ Googlesøgninger skimmes, muligvis links til betalingsmure
- ⦿ Efterfølgende søgning i PubMed eller lignende ...
- ⦿ Hvis man ikke kan finde PDF: Sci-Hub vinder over ILL
- ⦿ = ekstraarbejde og ikke en positiv brugeroplevelse
- ⦿ Men, problemet er mere lumsk end for mange klik og ventetid ...
- ⦿ Hvad med versioner, revisioner, forretningsmodel (grøn, gylden), embargoer og andre bekymringer
- ⦿ = forskerfrustration og brugere, der opfinder egne, upraktiske, uholdbare, ikke-skalerbare løsninger ...

# Hvem bruger Sci-Hub?

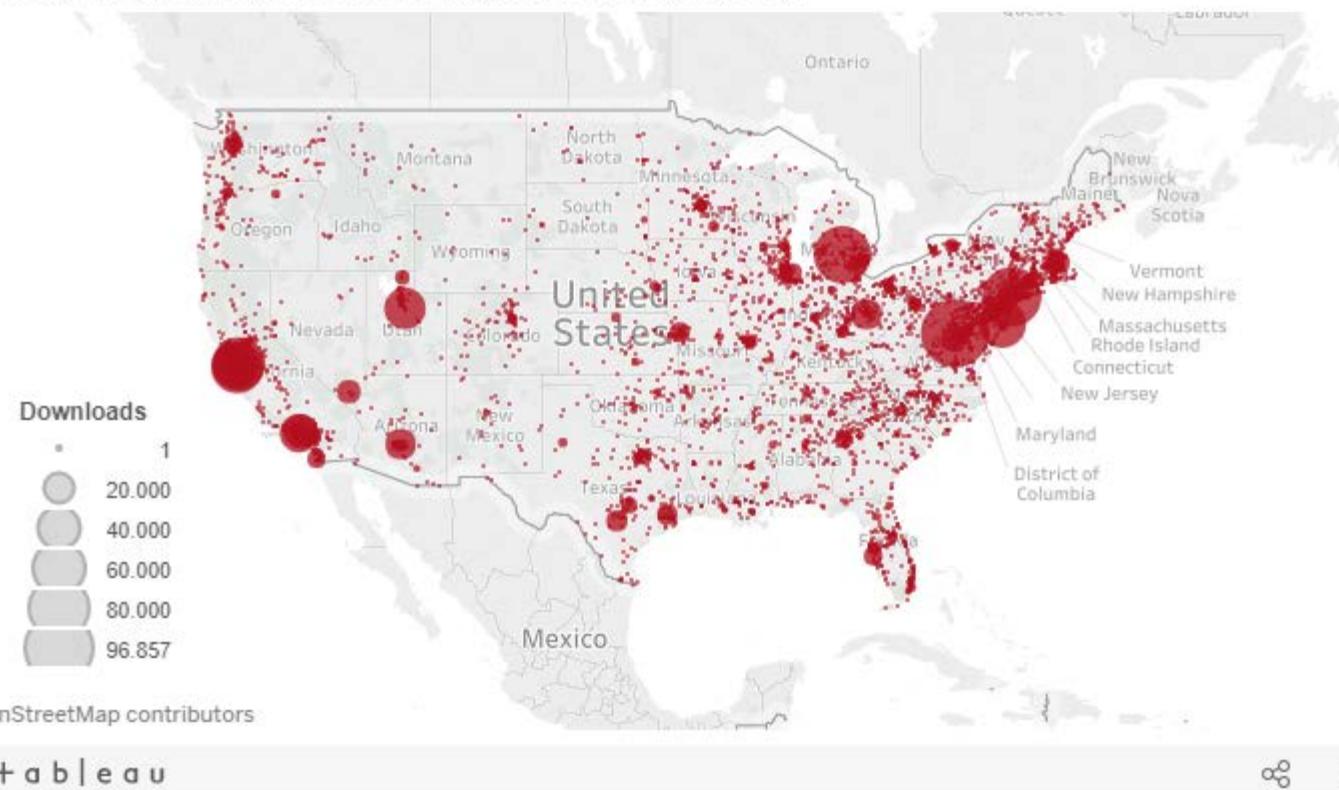

<http://www.sciencemag.org/news/2016/04/whos-downloading-pirated-papers-everyone>

# Hvem bruger Sci-Hub?

## Need or convenience?

Many U.S. Sci-Hub users seem to congregate near universities that have good journal access. The 5 cities with most requests were Ashburn, VA (96,857), New York, NY (73,606), East Lansing, MI (68,315), Fremont, CA (59,389), Mountain View, CA (56,637).

**Det tyder nok på, at *convenience* er et af de vigtigste parametre vi har!**

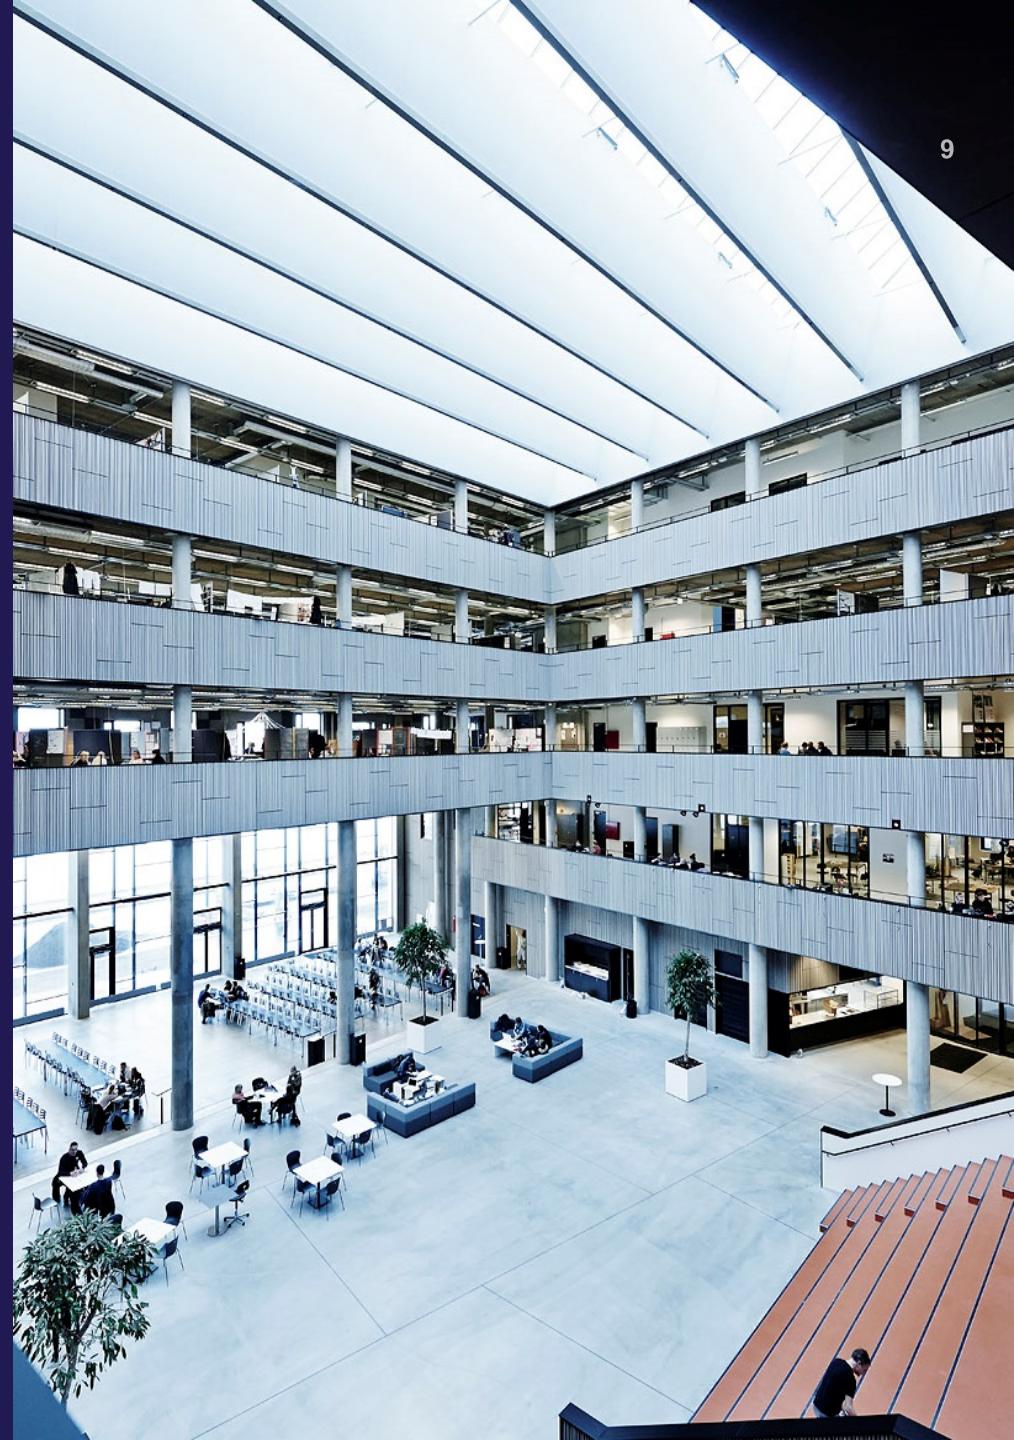

# Curling Open Access?

**Vi må hellere vende os mod de  
lovlige alternativer trods alt ...**

# Bibliotekets løsninger

- ⦿ Integrererede søgesystemer m. databrønde
- ⦿ Bibliotekslinks (linkresolver) i Google Scholar
- ⦿ Bibliotekslinks på udbyderplatforme
- ⦿ Fjernadgang
- ⦿ Serviceintegrationer mellem tjenester (f.eks. fjernlån, andre bibliotekers adgange, PPV, PDA og OA-tjenester)
- ⦿ = infrastruktur
- ⦿ Undervisning, vejledning og "help desk"
- ⦿ = forståelse, hjælp og forhåbentlig hjælp til selvhjælp
- ⦿ Samme service i det digitale rum som i det fysiske
- ⦿ = hvor vi adskiller os fra de andre tjenester

# Bibliotekets løsninger

- ⦿ Brugerne vælger ikke altid bibliotekets "nemme" løsning
- ⦿ Alle har forskellige præferencer, der passer bedre til deres temperament
- ⦿ Og nogle løsninger forankres i udgangspunktet slet ikke i bibliotekerne
- ⦿ F.eks. Google Scholar, Unpaywall, OA Button, Kopernio ... Sci-Hub

Jeroen Bosman @jeroenbosman · Apr 13

Replies to @lisalibrarian @ryregier @kopernio

Yep, which is why using Google Scholar with library links (SFX) installed and **@unpaywall** or **@kopernio** active is probably the most comprehensive approach for getting access.

# Frequently asked questions

## **How often does Unpaywall find full text?**

Overall, Unpaywall users find fulltext for 47% of articles. You may get different results, depending on the age and topic of the articles you're reading. There's more information on how we found these numbers in [this paper](#). This success rate will improve as we tweak our algorithm and as mandatory open access requirements take effect in the [US](#), [UK](#), [Europe](#), and elsewhere.

## **How do you find all these fulltext articles?**

We harvest content directly from thousands of open-access repositories worldwide. We also use great open data from [PubMed Central](#), [the DOAJ](#), [Crossref](#) (particulary their license info), and [DataCite](#).

## A sparse and high-order accurate line-based discontinuous Galerkin method for unstructured meshes

Per-Olof Persson

[Show more](#)<https://doi.org/10.1016/j.jcp.2012.09.008>

## Abstract

We present a new line-based discontinuous Galerkin (DG) discretization scheme for first- and second-order systems of partial differential equations. The scheme is based on fully unstructured meshes of quadrilateral or hexahedral elements, and it is closely related to the standard nodal DG scheme as well as several of its variants such as the collocation-based DG spectral element method (DGSEM) or the spectral difference (SD) method. However, our motivation is to maximize the sparsity of the Jacobian matrices, since this directly translates into higher efficiency in particular for implicit solvers, while maintaining many of the good properties of the DG scheme. To achieve this, our scheme is based on applying one-dimensional DG solvers along each coordinate direction in a reference element. This

# Så løser plugins nem adgang til Open Access?

- ➊ Det er i hvert fald en hjælp
- ➋ Unpaywall virker umiddelbart mere præcis i forhold til OA Button
- ➌ Man skal dog frem til landingssiden før du får svar (Kopernio undtaget, da den også virker som bibliotekslink i Google Scholar)
- ➍ Men, vores økosystem inkluderer jo licensbelagt indhold
- ➎ Bør samtidig integreres i biblioteksinfrastrukturen (den er faktisk stadig ret smart) – vi skal samle OA og licensbelagt
- ➏ Vi selv brug for forbrugsstatistikker
- ➐ Foretrækker vi subscriptionsressourcer brugt før OA-indhold?
- ➑ Vi må selv forsøge at bygge "convenience"

But the news is good: over the last year, several efforts are emerging to cover that last mile. Our contribution was [Unpaywall](#): an extension that shows a green tab in your browser on articles where there's an OA version available. [Unpaywall has enjoyed lots of success, adding over 100,000 active users in under than a year. Moreover, the backend database of Unpaywall \(formerly called oaDOI\) can be integrated into any number of existing tools, making it easier to spread OA content all over the place. For instance, we're already seeing over a million uses every day from library link resolvers.](#)

<http://blog.impactstory.org/>

# Integration direkte i link-resolver

Hvorfor er det vigtigt?

- Ikke alle bruger en Unpaywall, OA-button eller Kopernio-browserplugin
- Link-resolveren møder brugeren
- Vi har ikke altid licens til det ønskede materiale
- Vi har brugere, der ikke har de nødvendige rettigheder
- Vi sender et signal og promoverer OA
- Vi sparar nok lidt på ILL kontoen

4 Resultater for materialer på biblioteket

# Integration direkte i link-resolver

## Out-of-the-box integration i SFX og 360 Link

There are lots of ways you can use the Unpaywall dataset in your own projects, depending on what you're trying to do:

- **Librarians:** can integrate Unpaywall into their [SFX](#) or [360 Link](#) link resolvers, so library users can read OA copies in cases where there's no subscription access. Over 1000 libraries worldwide are now using this now.

# Hvordan kan vi sætte vores egen OA i spil?

- ➊ Unpaywall er dybt afhængig af DOI'er
- ➋ Tjek at Unpaywall kender vores repository (se <http://unpaywall.org/sources>)
- ➌ Skal vores egen OA tilgængeliggøres skal vi sikre, at publisher-DOI'erne altid registreres i f.eks. Pure
- ➍ Vi skal selvfølgelig også oprette DOI'er på publikationer, der ikke har tildelt et i forvejen
- ➎ Med DOI muliggør vi også f.eks. tracking mht. altmetrics
- ➏ Vi kan foretage kvalitetskontrol med datasættet
- ➐ Drop login på jeres linkresolver!
- ➑ Vi mangler et dansk OA repository, som kan høstes!

# Access to e-resources in Danish research- and educational libraries

36

## The cellulose synthase companion proteins act non-redundantly with CELLULOSE SYNTHASE INTERACTING1/POM2 and CELLULOSE SYNTHASE 6.

Endler, Anne · Schneider, Rene · Kesten, Christopher · Lampugnani, Edwin R. · Persson, Staffan

In: Plant signaling & behavior, Vol. 11, Iss. 4, 2016

Online full-text access is available at the following Danish Research and Educational Libraries:

Det Kgl. Bibliotek / AU Library

[Library Homepage](#) [Branches](#)

[Walk-in use](#) [Online](#)

DTU Library / Technical Information Centre of Denmark

[Library Homepage](#) [Branches](#)

[Walk-in use](#) [Online](#)

University Library of Southern Denmark

[Library Homepage](#) [Branches](#)

[Walk-in use](#) [Online](#)

Aalborg University Library

[Library Homepage](#) [Branches](#)

[Walk-in use](#) [Online](#)

The Royal Danish Library / CULIS - RUb

[Library Homepage](#) [Branches](#)

[Walk-in use](#) [Online](#)

If you are an employee or student associated with one of the above libraries, you can use the direct link to online full-text. If not, the libraries offer so-called walk-in use where you can access the full-text free of charge from within the library building. This option is particularly useful to persons with no affiliation to the libraries.

CITE AND EXPORT

[Make permalink](#)

CITES AND MENTIONS

[Cited 17 times in PubMed Central](#)

[Has 2 citations in Dimensions](#)

LINKS

[Search via Google Scholar](#)

*This item may be available for free on the public web.*

*Look for links labeled [html] or [pdf].*

[Search via Scientific Articles](#)

*Order scientific articles for pickup at your local library.*

*The service will take between 4 to 10 work days and you can order a maximum of 25 articles per month.*

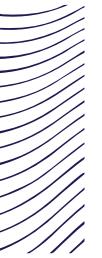

*Non-commercial use only.*

[Rent or buy through DeepDyve](#)

*The item is available via third party for payment or a monthly plan. The library does not take part in the delivery and payment.*

[Open Access version](#) 

*The item is available in an Open Access version found using the Unpaywall.org service. The item seems to be similar to the published version.*
