# Call for Radical Ideas

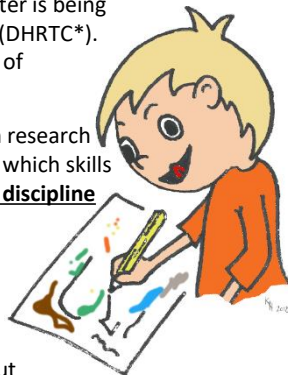

Spring 2020

## Unlock your potential by participating in an Ideation Session

Attention all researchers: A new research programme on produced water is being launched at the Danish Hydrocarbon Research and Technology Centre (DHRTC\*). As a radical add-on to the programme we have developed the concept of **Radical Innovation Jumpstart**, and we want you to participate!

You might not know anything about produced water or think your own research area is out of scope. However, with radical innovation you never know which skills are needed and where you'll end up. Therefore **no person or research discipline is out of scope, so don't hesitate to engage with us!**

We will introduce you to the topic and unlock your creativity in an interesting ideation session where **we promise to provide you with tools in your future work!** The session is 3½ hour.

### IDEATION SESSIONS:

<b>Esbjerg</b>	October 21 <sup>st</sup>
<i>Jylland**</i>	October 22 <sup>nd</sup>
<b>DHRTC</b>	October 25 <sup>th</sup>
<i>Sjælland**</i>	November 1 <sup>st</sup>
<i>Sjælland**</i>	November 7 <sup>th</sup>
<b>Aarhus</b>	November 13 <sup>th</sup>
<i>Jylland/Sjælland**</i>	November 14 <sup>th</sup>
<b>DHRTC</b>	November 19 <sup>th</sup>

*\*\*These sessions are potential. Once sign up meets our requirements the place will be determined. Learn more on our webpage.*

You might already know about our Radical Innovation Sprint. There are many similarities between Radical Innovation Jumpstart and Radical Innovation Sprint. However there are also a few differences.

**To apply for funding at least one of the applicants behind an idea must have participated in an ideation session. So don't hesitate to sign up!**

At the ideation session the Radical Innovation team will guide you to unlock your creativity and stimulate cross-collaboration while aiding ideation. You are welcome participate in more than one ideation session.

**Interested? Sign up now! All are welcome and don't hesitate to contact us:**

# Radical Innovation Jumpstart

## Ideation Sessions

Application  
2 December 2019

Radical Innovation facilitator

Cross collaboration  
between  
institutions and  
disciplines

How do I get inspired  
for radical ideas?

## Evaluation

Yes! We can get more  
radical when working  
together. Now let's work!

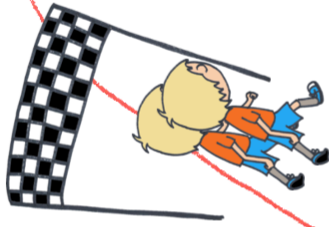

Look they collaborate  
between different  
disciplines

-and even across  
institutions!

Wow this is  
really radical!

So great that we teamed up!  
Who knew our different  
disciplines and work approach  
would be so beneficial.  
Doing research in oil and gas  
with DHRTC support is  
challenging but so much fun.

We did it!  
Good thing we  
teamed up.  
Together we  
knocked the socks  
of our idea!  
Lets collaborate  
further and submit  
our idea for the  
produced water  
programme.
