

# FAIR FOR PLAN

KARSTEN KRYGER HANSEN  
CHIEF CONSULTANT

**CLAAUDIA**  
RESEARCH DATA SERVICES

AALBORG UNIVERSITY  
DENMARK

- ▶ Not only about public data
- ▶ Not only about restricted data
- ▶ Not a quality standard
- ▶ Applied different across domains
- ▶ A way to start – not a last minute “conversion”

# PRINCIPLES

*noun*

plural noun: **principles**

1. a fundamental truth or proposition that serves as the foundation for a system of belief or behaviour or for a chain of reasoning.

"the basic principles of justice"

**Similar:** truth proposition concept idea theory postulate ▼

- a rule or belief governing one's behaviour.  
"struggling to be true to their own principles"

**Similar:** morals morality moral standards moral values ethics ▼

- morally correct behaviour and attitudes.  
"a man of principle"

**Similar:** morals morality moral standards moral values ethics ▼

2. a general scientific theorem or law that has numerous special applications across a wide field.

- a natural law forming the basis for the construction or working of a machine.  
"these machines all operate on the same general principle"

3. a fundamental source or basis of something.

"the first principle of all things was water"

- a fundamental quality determining the nature of something.  
"the combination of male and female principles"

- **CHEMISTRY**

an active or characteristic constituent of a substance, obtained by simple analysis or separation.

"the active principle of Spanish flv"

# AAU POLICY - ON FAIR

“4.3. The management of research data takes place in accordance with the intentions of the FAIR principles that aim to make research data retrievable, (F: Findable), reachable, interoperable (I: Interoperable) and possible to use. The FAIR principles always take the assumption of confidentiality into account. In the thinking and process, it is important to think of the method of data collection etc.”

<https://www.handbook.aau.dk/documents/2023/02/2570>

# IMPACT ON PRACTICE

Concept and  
planning

Exploring and  
organising

Collection and  
analysis

Output and  
publications

Impact and  
engagement

# MAN VS MACHINE

# MACHINE ACTIONABLE

- a) identify the type of object (with respect to both structure and intent)
- b) determine if it is useful within the context of the agent's current task by interrogating metadata and/or data elements
- c) determine if it is usable, with respect to license, consent, or other accessibility or use constraints, and
- d) take appropriate action, in much the same manner that a human would.

Wilkinson, M. D. *et al.* The FAIR Guiding Principles for scientific data management and stewardship. *Sci. Data* 3:160018 doi: 10.1038/sdata.2016.18 (2016)

- Prerequisite: (Research) software / infrastructure / method support
- "It cannot be applied to us ...."  
Might require a transition in software and/or method

# THREE REPEATED TERMS

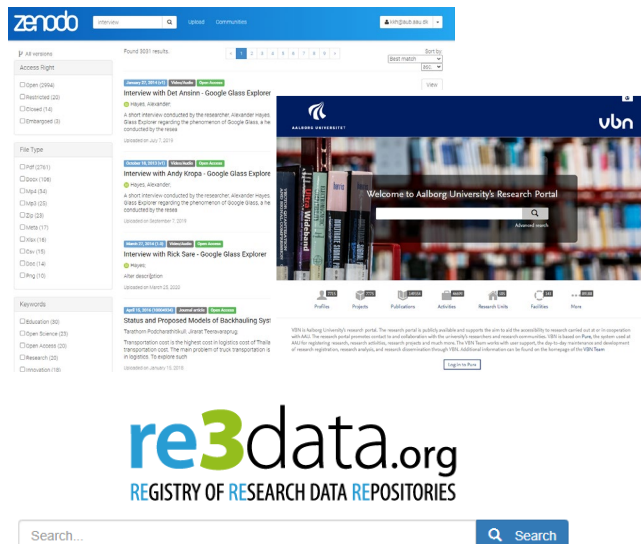

- Repository

- (meta)data

# REPOSITORY TYPES

## A library - the download analogy

### Generic vs subject specific

The screenshot shows the Zenodo website with a search bar at the top. Below the search bar, there are filters for 'All versions', 'Access Right', 'File Type', and 'Keywords'. The main content area displays search results for 'Interview with Det Anders - Google Glass Explorer'. At the bottom, there is a search bar with the text 'Search...' and a 'Search' button.

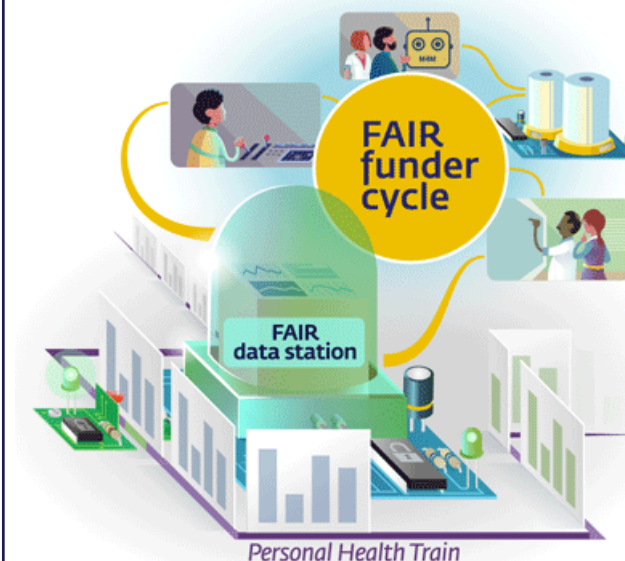

**re3data.org**  
REGISTRY OF RESEARCH DATA REPOSITORIES

## An interface (API) - the query analogy

```
SELECT ?item ?itemLabel 2
WHERE 3 { 4 ?item wdt:P31
wd:Q146. 5 SERVICE
wikibase:label {
bd:serviceParam
wikibase:language
"[AUTO_LANGUAGE],en". } 6 }
```

## A black box service - the visiting analogy

- ▶ F1. (Meta)data are assigned a globally unique and persistent identifier
- ▶ F2. Data are described with rich metadata (defined by R1 below)
- ▶ F3. Metadata clearly and explicitly include the identifier of the data they describe
- ▶ F4. (Meta)data are registered or indexed in a searchable resource

DOI example:

10.5281/zenodo.2248200 =>

<https://doi.org/10.5281/zenodo.2248200>

GRID example:

grid.5117.2 => <https://grid.ac/institutes/grid.5117.2>

- ▶ A1. (Meta)data are retrievable by their identifier using a standardised communications protocol
  - ▶ A1.1 The protocol is open, free, and universally implementable
  - ▶ A1.2 The protocol allows for an authentication and authorisation procedure, where necessary
- ▶ A2. Metadata are accessible, even when the data are no longer available

## University of Bristol Research Data Request

What will happen to the information which you provide?  
We will use the information you provide to fulfil your data access request following the process outlined below. Your personal information will be processed in order to fulfil this contract. We will keep your information securely and will only share it beyond the University of Bristol if required to do so by law. We will retain your information for six years or, should your request be successful, for the duration of the Data Access Agreement, whichever is longer. After this time your information will be deleted.  
For more information on how we use your data and to request a copy of the information you provide in this form please email the Research Data Service at [data-bris@bristol.ac.uk](mailto:data-bris@bristol.ac.uk). If you wish to make a complaint about how your personal information is being processed by the Research Data Service, contact [data-protection@bristol.ac.uk](mailto:data-protection@bristol.ac.uk).

How do we process applications for 'Restricted' data?  
The Research Data Service review the application, and will check that the information you have provided is complete and in adherence with the following criteria:  
- The dataset you have requested is available for sharing  
- You have provided a verifiable institutional affiliation  
- You have provided verifiable institutional contact details  
- You have nominated an appropriate institutional signatory (see paragraph below)  
- You have ethical approval in place (this may not be required depending on the nature of the requested dataset)  
- If your research is funded, commissioned or sponsored, you should provide documentary evidence of this  
If your application meets the criteria, a Data Access Agreement (example Data Access Agreement for a restricted dataset - <http://bit.ly/2ITs3T3>) is sent to your nominated institutional signatory. A suitable signatory may be from your contracts department, legal department or research office, depending on the nature of your institution. Once the agreement is signed and returned, the Research Data Service team will arrange secure access to the dataset.

How do we process applications for 'Controlled' data?  
The assessment of requests for 'Controlled' data access is very similar to that described above, with an additional stage. The Research Data Service will perform the same initial checks as outlined under and if your application meets the criteria given above, the Research Data Service team will forward your request to the creator of the data (or a colleague nominated by them) to check that your planned research can be supported by the dataset. If it cannot, you may wish to amend your planned research. This stage can take some time and should be seen as a conversation between an

Highest reuse value?

# REASONS NOT TO PUBLISH

- Confidentiality *adhere*
- Patent filing *wait*
- Sensitive data *alter or restrict*
- Licensed material *seperate*
- Uncertainty *ask*

**FAIR is still possible**

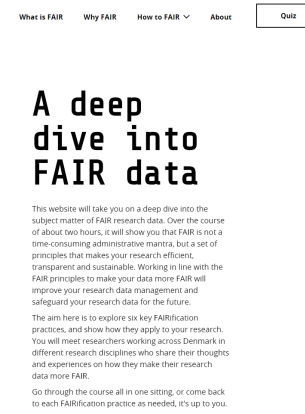

# STEPWISE APPROACH TOWARDS MORE FAIR'ness

- **Investigate** - find any requirements, expectations, good practice ...
- **Invest** - any changes needed in your current setup
- **Implement** - go do FAIR
- **Iterate** - follow up as reality overtakes the plan
