Aalborg University Research Indicator

A new framework for applying classic bibliometrics and open science indicators in research evaluations

The need for a reform on research assessment requires actions and a willingness to challenge existing indicators. At Aalborg University, we have developed a new research indicator inspired by the Agreement on Reforming Research Assessment (Coalition for Advancing Research Assessment, 2022).

In this poster, we describe how the main principles and requirements of the Agreement have inspired a new institutional-level framework with the aim to deliver data, statistics, and indicators to support internal strategic development, research assessment, and resource allocation. The main idea behind the new indicator is to broaden the scope of how universities use classic bibliometrics in assessments and to include Open Science in these evaluations.

### AVAILABLE DATA FROM THE PURE SYSTEM (PART B)

**Collaboration**
- External collaboration
- Internal collaboration
- Students Technical and administrative staff

**Visibility**
- Media coverage
- Online attention
- Societal impact

**Openness**
- Open Access
- Membership in external fora
- Active profile AAU’s in institutional research portal (vbn.aau.dk)
- Active profile ORCID Active profile Google Scholar

### AAU RESEARCH INDICATOR

**Research Indicator**

**Bibliometric - Part A**

**Open Science - Part B**

**Contribution**

Part A: Subject neutral and applied directly to support internal distribution of basic research founding

Part B: Developed to showcase subject specific research strategies at the department level
