5. Teaching activity development and teaching materials: A list of any contributions to the development of new modules, teaching materials, study programmes, e-learning, collaboration with external business partners, etc.

Rikke Ørngreen is a professor and researcher in IT and learning design, therefore there is both a lot of research and teaching that relates to this point. Over time, she has developed many digital learning materials and has researched and

developed many forms of e-learning and digitally supported learning. Rikke works with research and development of IT-based learning designs and digital methods in research, including creative audiovisual methods and the use of video. For more information, see the publication and project lists here <https://vbn.aau.dk/en/persons/126278>.

6. Teaching awards you may have received or been nominated for.

In her work, Rikke Ørngreen has received nominations from the specific educations, and from presentations and posters from learning conferences.

7. Personal reflections and initiatives: Here you may state any personal deliberations as regards teaching and supervision, any wishes and plans for further pedagogic development, plans for following up on feedback/evaluations from students, etc.

As a researcher and teacher within IT and learning design, Rikke Ørngreen is interested in creative audiovisual methods that support inquiry, reflection and collaboration. Over the years, she has worked a lot with both problem-based and case-based learning, and with workshops as a learning tool. For more information, see the publication and project lists here <https://vbn.aau.dk/en/persons/126278>.

8. Any other information or comments.

Rikke Ørngreen is currently deputy head of research at the Institute for Culture and Learning, a large Institute with around 300 employees and 14 research groups in Aalborg and Copenhagen. Therefore, it is the research management and development that takes up time, compared to more traditional university teaching tasks.
