7. Evt. personlige refleksioner og initiativer: Personlige overvejelser knyttet til undervisning og vejledning, ønsker til og planer for pædagogisk videreudvikling, planer for opfølgning på

undervisningsevalueringer m.v. Refleksioner over eget pædagogiske arbejde, dets målsætninger, metoder og gennemførelse. I refleksionen analyseres og motiveres dine pædagogiske aktiviteter i forhold til din pædagogiske forståelse og de studerendes læring. Tanker om undervisningsformen på Aalborg Universitet, der har et stort indhold af gruppeorganiseret projektarbejde og problembaseret læring (PBL).

My overall teaching philosophy is to plan and stimulate an inclusive learning environment in which I can support the students in creating or developing generic academic skills such as critical awareness and analytical thinking about the 'taken for granted' knowledge on which society is organized and reproduced.

My aim is to make available a variety of tools and methodologies for the students to engage in the process of understanding and critically relate to the multi-facetted body of knowledge in the field - in other words to stimulate their curiosity through motivation and engagement. Their curiosity may also be stimulated through disagreeing with my ethical and normative approach to societal processes. Most important for me is that at the core of my teaching philosophy lies my belief that learning happens in the space between the students, the teacher and the subject matter. I learn from them - as they learn from me and then I must, as the teacher, strive to critically reflect on my own motivations and engagement in the process.

Thus the learning situation is equally a learning opportunity for me and for the students, but on different levels and with different power implications. Something that I also needs to be aware of when I invite them to co-create the learning space with me. I seek proficiency in teaching and communicating my research and knowledge and this is a neverending learning process – what Jerome Bruner would characterize a learning spiral.
