Research profile

My main research area is focused on the **treatment of urothelial cancer and other urologic cancers** as well as **the immune system in relation to cancer**.

Other focuses of interest are:

Cancer-related malnutrition and cachexia, in particular loss of muscle mass (sarcopenia)

Real-world studies on the impact of novel antineoplastic regimes

Patient-reported outcome measures (PROM)

I am a board member of the DMCG association the Danish Bladder Cancer Group (DaBlaCa) as well as chairman of the danish medical council group on bladder cancer.

My primary goal is to conduct investigator-initiated high impact research as well as sponsor-investigated studies on novel medicine.

As a part of the research group at the Department of Oncology, I am committed to contributing to high scientific quality of cancer research within all areas of oncology and, thereby, contribute to basic scientific and clinical research results within clinical oncology and medical physics.

Clinical research is conducted in cooperation with Clinical Research Unit (CRU), Clinical Cancer Research Center (CCRC), Department of Clinical Medicine, the management of Department of Oncology, and other clinical departments at Aalborg University Hospital, as well as national and international networks.

The research group at the Department of Oncology conducts research of high scientific quality within all areas of oncology and, thereby, contribute to basic scientific and clinical research results within clinical oncology and medical physics.

Clinical research is conducted in cooperation with Clinical Research Unit (CRU), Clinical Cancer Research Center (CCRC), Department of Clinical Medicine, the Department of Oncology, and other clinical departments at Aalborg University Hospital, as well as national and international networks.
