2022

- Participated in the formulation of new teaching targets and course titles in Sustainable Design, 5th semester.

2023

- Participated in the restructuring of the course "Institutional frameworks for sustainable technology development" (TAN3).

## **6. Teaching awards you may have received or been nominated for.**

2022

Nominated for teacher of the year at the TECH-faculty

## **7. Personal reflections and initiatives: Here you may state any personal deliberations as regards teaching and supervision, any wishes and plans for further pedagogic development, plans for following up on feedback/evaluations from students, etc.**

Type your answer here...

## **8. Any other information or comments.**

A couple of quotes from the students

- Emil taught the Sustainability, Economy and Poltic (BØP) course on the 5th semester of the BD bachelor. It was the funnest, most engaging and eye-opening course both in regards to sustainability, transition processes and overall understanding of the challenges and purpose of our work. Emil would always demand and create engagement to, what potentially could've been very dry, subjects in a way that made everything feel essential (from the nomination for teacher of the year at TECH).

- It felt like Emil where very passionate and experienced in the course. He was interested in developing the course during his teaching and would often restructure lectures to better accommodate what we student and he found interesting in a certain subject. Emil where open to new perspectives, and if challenged or offered new information, would happily engage in new discussions once he was on more stable ground (from the nomination for teacher of the year at TECH).
